

SHAIK KASHIF

FULL STACK DEVELOPER | REACT.JS | ANGULAR | MERN STACK

Hyderabad, Telangana, India | +91 7013717836 | kashifcodes10@gmail.com

GitHub | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of professional experience at Inspiration Innovations, with strong hands-on experience in React.js and practical backend development using Node.js, Express.js, MongoDB, Mongoose and REST APIs. Experienced in building responsive UI screens, reusable components, forms, data tables, CRUD workflows and API integrations, while also working with routers, controllers, models, authentication and role-based authorization. Familiar with Angular through personal learning and practice, including components, services, routing, reactive forms, HTTP Client, guards, RxJS and Angular Material.

TECHNICAL SKILLS

Frontend: React.js, Angular, JavaScript ES6+, HTML5, CSS3, Material UI, Tailwind CSS, Bootstrap

React: React Hooks: useState, useEffect, useContext, useMemo, useCallback; React Router, Redux, Redux Toolkit, Axios

Backend: Node.js, Express.js, REST APIs, Authentication, JWT, Role-Based Authorization, API Integration

Database: MongoDB, Mongoose, MongoDB Queries, ObjectId References, populate()

Forms & Validation: Formik, React Hook Form, Yup, Form Validation

Tools: Git, GitHub, Postman, VS Code, Environment Variables

Development: CRUD, Protected Routes, Responsive Design, Component-Based Architecture

PROFESSIONAL EXPERIENCE

React.js Developer (Full-time) | Inspiration Innovations

July 2025 – Present

- Develop responsive React.js interfaces, new UI screens, reusable components and new application features for an enterprise Business Management System.
- Work on existing ERP modules across Sales, Purchase, Staff, Finance and Permissions, contributing to both frontend and backend functionality.
- Integrate REST APIs with Axios and build CRUD workflows with forms, validation, data tables, search, edit/delete actions and success or error handling.
- Develop and modify backend routers, controllers and Mongoose models, and work with MongoDB queries and related data using Node.js and Express.js.
- Implement and work with authentication, protected routes and role-based authorization across frontend and backend application flows.
- Debug UI and application issues, improve existing screens and use Git/GitHub as part of the development workflow.

React.js Intern | Inspiration Innovations

July 2024 – June 2025

- Developed React.js UI screens and reusable components for application modules and responsive layouts.
- Integrated APIs using Axios and worked with forms, tables, CRUD workflows and frontend validation.
- Participated in debugging, testing and maintenance of existing application features using Git-based development practices.

PROFESSIONAL PROJECT

Business Management System (BMS) / ERP Application | Company Project

Technology Stack: React.js, React Router, Material UI, Axios, Formik, Yup, Context API, Node.js, Express.js, REST APIs, MongoDB, Mongoose, Authentication Middleware, Git/GitHub

- Enterprise-style modular application with business and educational areas, including Company, School, Students, Teachers, Parents, Users, Customers, Suppliers and Employees.
- Contributed to Sales modules such as Customers, Sales Invoice and Receipts; Purchase modules such as Suppliers, Purchase Invoice and Payments; Staff, Finance and Permissions modules.
- Built and maintained React screens using MUI, React Router, reusable components, forms, data tables, search and responsive layouts.
- Worked end-to-end on selected features from React UI and Formik/Yup validation through Axios REST calls, Express routers/controllers, authentication/authorization middleware, Mongoose models and MongoDB.
- Worked with role-based access control for protected application areas and API operations across COMPANY, USER, TEACHER, STUDENT and PARENT roles.

SELECTED PERSONAL PROJECTS

Real Estate Property Finder

Technology Stack: React.js, Node.js, Express.js, MongoDB, Firebase Authentication, REST APIs

- Built a full-stack real estate application for property listings with authentication, protected access and an admin area.
- Implemented property listing workflows including adding, editing and deleting properties, along with search functionality and CRUD operations.
- Connected React frontend screens to Node.js/Express REST APIs and MongoDB-backed data.
- Used Firebase Authentication for user authentication and protected application functionality.

Hotel Booking Application

Technology Stack: React.js, Tailwind CSS, Clerk Authentication

- Developed a responsive hotel-focused React application with reusable UI components and an admin panel for managing hotel-related content.
- Implemented sign-in and sign-up using Clerk Authentication and protected the relevant authenticated areas.
- Used JavaScript object data for the current application data layer, with the project structured for future backend integration.

ANGULAR

Practical learning and personal practice with Angular components, services, routing, forms, reactive forms, HTTP Client, guards, RxJS, Angular Material, CRUD operations and API integration.

EDUCATION

Bachelor of Commerce (Computers)

Kakatiya University, Telangana | 2026

CERTIFICATION

Full Stack Web Development Certification

Naresh IT, Ameerpet, Hyderabad

LANGUAGES

English, Hindi, Telugu, Urdu

ADDITIONAL TECHNICAL FOCUS

Hands-on with REST API based frontend/backend communication, protected routes, authentication and authorization, reusable React components, form validation, CRUD module patterns and Git/GitHub workflows. Comfortable reading and modifying existing enterprise codebases and extending modules without changing the overall application structure.
